EVIDENCE OF BRIBERY

BOUGHT A PHILADELPHIA COUNCIL.

Big Blocks of Stock Given to David Martin, the Well-Known Political Lender-Other Details.

PHILADELPHIA, Pa., Aug. 5 .- To-day's session of the senatorial investigation committee assumed a sensational aspect late this afternoon. Julian A. Gale, former secretary of the Mutual Automatic Telephone Company, a concern which secured valuable franchises from the city through, it was alleged, wholesale bribery of councilmen of both branches, was the star witness. Gale was mysteriously absent during the investgation of the bribery charges by a committee of Councils about two years ago and his appearance to-day caused a flurry in the hearing room.

Mr. Gale said that he had been given a

six-thousand-share certificate of the stock. with instructions to divide it into seventyfive certificates of six shares each, twentyfive certificates of twenty shares each, four certificates of five hundred shares each certificates of 1,525 shares certificates. the names of Dave Martin, the political leader of this city, and State Senator Charles A. Porter. The two five-hundred certificates were afterwards divided in fifty lots of five shares each. The witness said he took these certificates to the Republican city committee rooms and gave them to Mr. Martin. The latter said, according to the witness, that Gale would have to indorse the certificates. The witness testifies that he went over to the office of tax receiver Taylor in company with James Handley. Then, he said, he returned to the ublican city committee rooms and handed the certificates to Mr. Martin, who placed them in a grip sack. Gale said that he was spending a vacation in Baltimore when the councilmanic investigation was in progress. While there he got a telegram from John P. Fersch, president of the Aucompany, asking that he meet him in New York. The meeting took place, according to the witness, in the law office of ex-Governor Walter. He said that during the councilmanic investigation Mr. Martin visited Trenton twice for the purpose of

conferring with John P. Persch. George Persch, who was in the employ of the Mutual Automatic company, corroborated Gale's story. He described how the stock was "split up" and said he was at the office of the company when Mr. Martin called to get the certificates. The witness then told how he had gone to New York during the investigation of the telephone scandal, and detailed various sums of ney which he alleged had been paid to im by Mr. Martin. William Persch, another brother, corroborated some of the most essential parts of George Persch's testimony. The committee at 6 o'clock adfourned until II o'cleck to-morrow.

IN A LION'S JAWS.

Little Eddie Hurd's Hend Crushed to Pulp by a Jungle Beast.

CHILLICOTHE, O., Aug. 5 .- In Thomas Hurd's animal show, at the fair grounds here, there are, besides other wild animals, one tiger, several leopards and lions, Among them was a large lion chained near the entrance to the tent as a catching advertisement. It was a young beast and the owner prided himself on its docility and peaceableness. Eddie Hurd, eighteen menths old, son of the proprietor, was playing near the animal and came within ts reach. The mother caffed the child away, but too late. The ferocious animal seized the infant by the head and shook it as a terrier dog would shake a rat. The mother, reckless of danger, rushed to the rescue of her babe and might have been torn to pieces but for the quick presence of mind of the father scaring the lion with a whip. The lion let go the child, but it was a corpse, its baby head crushed out of semblance to anything human. The affair caused a panic in the crowded grounds and soon emptied them.

The show is really a section of Hagenbeck's collection of animals, and Thomas Hurd is manager of it. A negro servant left the child near the iion while she went far a bucket of water. Some one apprised

Friends' Ministerial Conference. Special to the Indianapolis Journal. CARMEL, Ind., Aug. 5 .- The present session of the Ministerial Association of the Western Yearly Meeting of the Friends' Church, now being held at this place, is in the main well attended. While some of those who are to take part in the programme are unavoidably absent, their places are generally supplied and the work goes on. Last night in the public service Louis Hadley took A. F. Mitchell's place, preaching from a part of the seventeenth verse of the seventh chapter of John: "If any man will do His will he shall know of the doctrine." It was a plea for orthodoxy -orthodoxy of conduct. There was a time, he said, when the members of the church were very heterodox in their belief and most orthodox in their behavior. Now, he regretted to say, the time had come when they are very orthodox in their belief and mest heterodox in their daily life. He pleaded, too, for lives of action rather than lives of profession, and exhorted his brethren to be not simply Christians, but ip-to-date Christians.

The devotional exercises this morning were conducted by Nathan Clark. Amos History and the Bible-the First Century He dwelt upon the influence which the birth of Christ had upon the Roman empire and its subsequent fall. Then folowed a general discussion, led by Louis A. Hadley, of the subject, The Blood of Christ," in which the commonly accepted loctrine of the atonement was considered. At 10 o'clock Thomas C. Brown delivered sermon to the public. This afternoon's programme was as follows: Devotional exs, conducted by Amy Cooper; checies Concerning the Jews and Second Coming of Christ," by Albert J. he big, hearty, healthy man is a continnal writation to his dyspeptic friend. One man in a hundred is perfectly healthy. The other 99 have some digestive trouble, and perhaps more than 50 per cent. of these could trace their trouble to that most prevalent evil-constipation. It's a simple thing of itself, but like many simple things, it may grow and become complicated, Constipation is the root of nine-tenths of the sickness of men, and of a large proportion of the sickness of women. It can be cured. It can be cured easily, naturally and quickly. There is no reason save that of carelessness why it should cause the trouble that it does. Nature is continually working as hard as she can to throw off impurities, and to force out poisonous refuse matter. Nature is not a dray-horse and should not be overworked. Nature is systematic. Some little thing may interfere with the system, and cause serious derangement. The removal of this little impediment sets the wheels working again without any trouble.

This is exactly what Dr. Pierce's Pleasant Pellets do. They assist nature in a gent's. healthful, efficient way. There is nothing violent about their action, and yet it is just as certain as if it were twice as violent. The use of the "Pellets" doesn't degange the system in any way, and once it is in order, you can stop taking them. There are unscrupulous druggists, who will tell you that something else is "ust as good." They are mistaken - or worse. Whether they are ignorant or untruthful matters little to you if you do not get the "Pellets." Insiet on met an arter an art fac
